

# JOEL CAMPOS

*Full-Stack Software Engineer*

Guadalajara, Jalisco | joelcamposlalo@gmail.com | +52 33 25 79 98 04 | linkedin.com/in/joel-campos

## Profile

Full-stack software engineer with a strong specialization in JavaScript (React.js, Node.js) and solid experience in SQL-driven systems and Laravel-based platforms. Proven track record integrating banking APIs, maintaining C# legacy systems, and building digital service solutions for government operations. Focused on clean, scalable, and secure architectures.

## Key Skills

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap

**Backend:** Node.js, Express.js, Laravel (PHP), C# (.NET Core)

**Databases:** SQL Server, PostgreSQL, MySQL

**Tools:** Git, AWS, Figma, DevExpress, Shopify, WordPress

**Other:** REST APIs, Stored Procedures, System Integration, Debugging Legacy Code

## Professional Experience

**Software Engineer — City Government Platform (Zapopan)** Feb 2023 – Present

- Developed SQL stored procedures to optimize heavy data operations for citizen services.
- Led React.js development for fee calculation and license management platforms.
- Integrated Banorte banking API, enabling online tax and license payments directly from citizen portals.
- Maintained and debugged C# + DevExpress legacy systems for financial reconciliation.

**Software Engineer — Freelance / Agency Projects** May 2021 – Feb 2023

- Built e-commerce and landing page systems using Shopify, WordPress, and Laravel.
- Implemented UI customizations using Liquid (Shopify) and PHP templates.
- Integrated analytics and marketing tools like Klaviyo and Google Tag Manager.
- Delivered responsive, SEO-optimized, and high-performance front-end layouts.

## Education

**B.S. in Information Technology Engineering** — Universidad Tecnológica de Jalisco, 2019 – 2023

## Languages

Spanish — Native | English — Professional Working Proficiency

## Highlights

- Key developer in digital transformation initiatives for local government.
- Hands-on experience connecting legacy systems with modern web architectures.
- Skilled at cross-stack problem-solving from database to UI.
